

HOW T ZIELD HELPS THE PANCREAS AND IMMUNE SYSTEM

T ZIELD is like a peace protector. It helps calm the immune system.

It tells the immune cells to stop attacking the pancreas.

The pancreas stays healthy longer and can keep making insulin (keys) for more time!

T ZIELD helps protect the pancreas so it can keep making insulin keys longer.

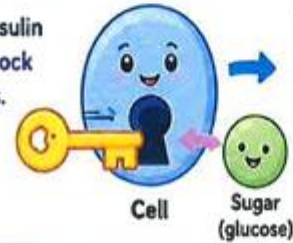

WHAT DIABETES IS

The pancreas makes insulin keys.

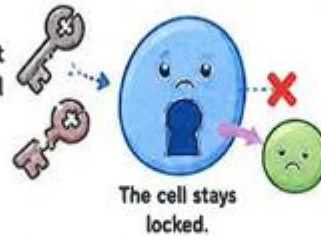

These insulin keys unlock the cells.

When the cell is unlocked, sugar (glucose) can go in and give us energy!

IN DIABETES:

The body doesn't use the keys well or doesn't make enough keys.

Sugar can't go in, so we don't get energy and feel sick.

Insulin keys help sugar go into cells to give our body energy!
