

Diamon Demo App (available only in iOS)

Thank you so much for your interest in our mobile app, ***Diamon***.

What is ***Diamon's*** value? It provides a transparent communication platform linking the CGM of the youth/person with T1D (PWD) to instructions entered by the parent or healthcare provider. For example, the parent might choose "juice box" to be given if the CGM is less than 70 mg/dL. If the CGM drops to 65, an alert goes out to all phones. When the PWD selects "awake with symptoms," then clicks "take juice box," and presses DONE, the message goes out to every phone that the instructions were followed. Everyone sees the same thing at the same time. ***No calls, no texts, no worry.***

We have a ***Diamon Demo*** app that allows you to test the ***Diamon*** app. To get it:

- Download TestFlight from the Apple App Store.
- Use this link to get the ***Diamon Demo*** app: <https://testflight.apple.com/join/U4VRtCi0>

In addition to using ***Diamon Demo***, which is interactive, you can look through screenshots of the app on a webpage.

Here's the link to the screenshots: <https://minervaanalysis.com/chs/index2.php>. There are 3 tabs—feel free to enter feedback.

The ***Diamon Demo*** app is similar to the actual ***Diamon*** app with some differences:

In both you can:

- Set up an account and a "Mode" (different sets of instructions, e.g., "soccer practice" vs. "night")
- Answer questions and check instruction boxes.
- Enter text in the small "Comment" box within the Alert section. This allows you to have a free text back and forth with your Follower/PWD.

What's different with ***Diamon Demo***?

- The CGM values are artificial and change very quickly. This fast pace of change means you don't always have time to answer. Do not worry: the real ***Diamon*** app changes at the pace of the real CGM.
- You cannot invite a Follower or therefore see Follower responses.
- There are no associated Push Notifications. The actual ***Diamon*** app sends notifications so you see on the front of your phone screen if the PWD has responded.

We have a multiple-choice tech survey which we encourage you to fill out as best you can based on ***Diamon Demo***. Click this link <https://minervaanalysis.com/chs/q/index.php> and use the PW "Bk39sjs?fj3@fjkdNeoan". Put "T1Dexchange" as Study ID.

Thank you,
The ***Diamon*** Study Team
